Peregrine (formerly Extricity)

The Business Integration Suite (BIS) is Peregrine's next generation integration platform that provides a single, complete solution for both Enterprise Application Integration and Business Process Management. In addition, Peregrine has developed specific professional services offerings to assist customers with co-existence or migration plans from competing vendors, such as webMethods.

The Peregrine Business Integration Suite provides a single-vendor solution that addresses the needs of total business integration, bundling into a single product suite:

- Enterprise Application Integration
- Business Process Integration
- Automated workflow and network services
- B2B connectivity
- Data transformation
- Customer/supplier on-ramping services
- Messaging.

Peregrine's Business Integration Suite includes a wide variety of integration adapters for use with back-end systems such as ERP applications, databases, and mainframes, standards-based mechanisms for data transport between systems and trading partners, system monitoring capabilities, advanced data transformation, and an intuitive application/workflow development environment. The solution also provides a data transformation engine that enables real-time, any-to-any conversions between disparate data formats, including various forms of XML, X12, EDIFACT, SAP IDOCs and industry standards such as RosettaNet, CIDX and OAG.

About ZapThink, LLC

ZapThink is an IT market intelligence firm that provides trusted advice and critical insight into XML, Web Services, and Service Orientation. We provide our target audience of IT vendors, service providers and end-users a clear roadmap for standards-based, loosely coupled distributed computing – a vision of IT meeting the needs of the agile business.

ZapThink's role is to help companies understand these IT products and services in the context of SOAs and the vision of Service Orientation. ZapThink provides market intelligence to IT vendors who offer XML and Web Services-based products to help them understand their competitive landscape and how to communicate their value proposition to their customers within the context of Service Orientation, and lay out their product roadmaps for the coming wave of Service Orientation. ZapThink also provides implementation intelligence to IT users who are seeking guidance and clarity into how to assemble the available products and services into a coherent roadmap to Service Orientation. Finally, ZapThink provides demand intelligence to IT vendors and service providers who must understand the needs of IT users as they follow the roadmap to Service Orientation.

ZapThink's senior analysts are widely regarded as the "go to analysts" for XML, Web Services, and SOAs by vendors, end-users, and the press. They are in great demand as speakers, and have presented at conferences and industry events around the world. They are among the most quoted industry analysts in the IT industry.

ZapThink was founded in October 2000 and is headquartered in Waltham, Massachusetts. Its customers include Global 1000 firms, public sector organizations around the world, and many emerging businesses. ZapThink Analysts have years of experience in IT as well as research and analysis. Its analysts have previously been with such firms as IDC and ChannelWave, and have sat on the working group committees for standards bodies such as RosettaNet, UDDI, CPExchange, ebXML, EIDX, and CompTIA.

Call, email, or visit the ZapThink Web site to learn more about how ZapThink can help you to better understand how XML and Web Services impact your business or organization.
